

PHP

Knowledge of OOP

basic understanding with a strong foundation: not just the "3 main principles" but the understanding of abstractions, inheritance, and the meanings of each principle.

Understanding of algorithms

basic understanding but not "heard something about it".

Database basics

logical connections, indexes, building requests.

PHP basics

syntax, array operators, basics of OOP.

Git - optional

basic skills.

Composer - optional

basic skills.

MVC

MVC - optional

basic understanding.

Frameworks - optional
